

Crem EX3 Espresso Machine

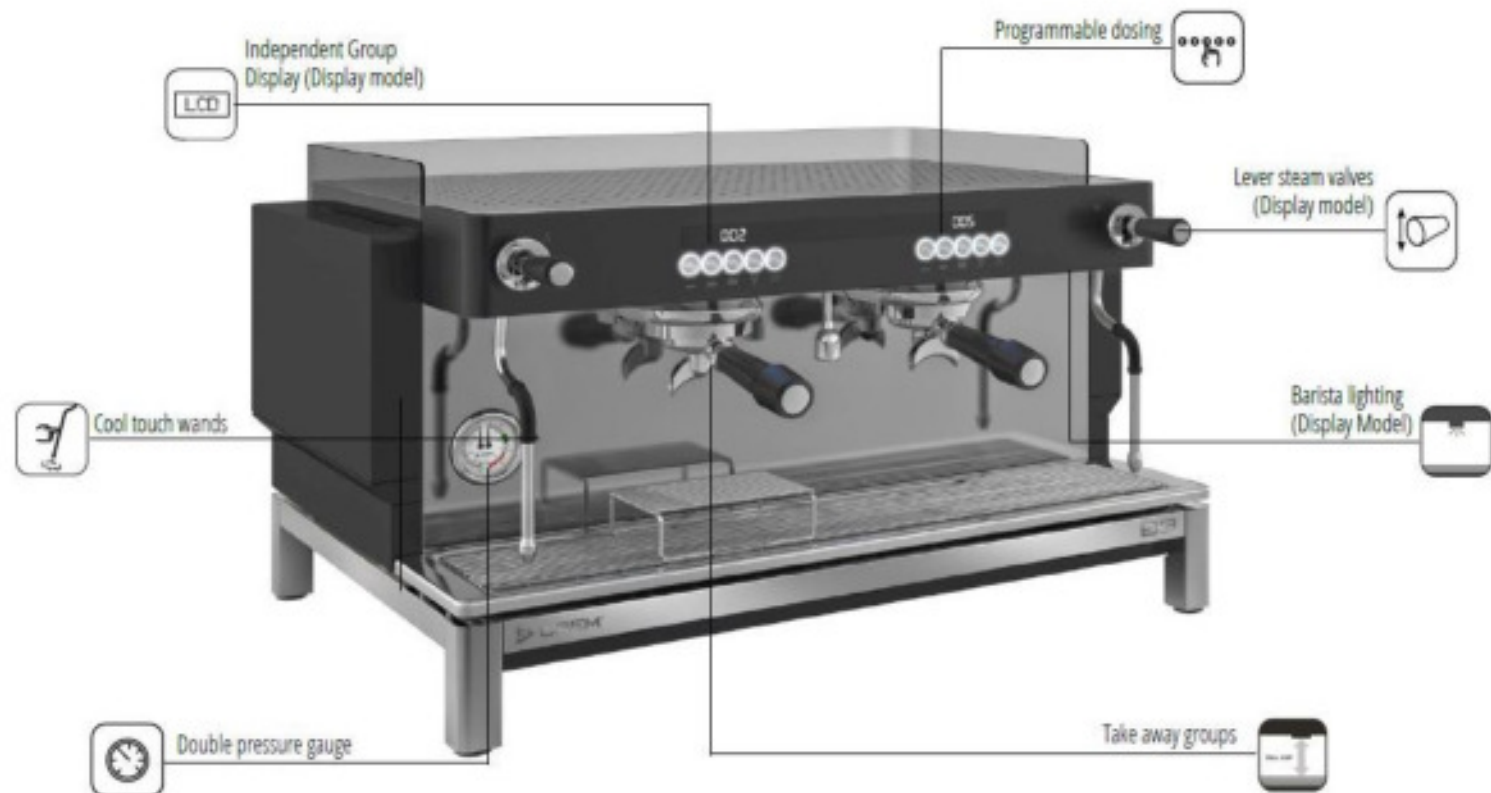

Versions – 2-Group Compact 6 Litre Boiler / 2-Group 11.5 Litre Boiler / 3-Group 17.5 Litre Boiler

Colours – Matt Black or White

The brand new Crem espresso machine - EX3 - has been thoroughly and carefully designed. Not only from a technical point of view, but also taking into account a 360° project approach, which has eventually led us to this exciting new concept line within the Crem espresso portfolio. The EX3 is an attractive and extremely versatile professional espresso machine. Featuring a smart design concept, it can be easily customized, and manufactured, through the combination of a wide range of different options, both external and technical. Thus, the EX3 is aimed to suit any kind of business with an espresso demand, whether an independent café or national chain.
